NOTICE OF TITLE V PERMIT RENEWAL

NOTICE IS HEREBY GIVEN THAT Southern California Gas Company's South Needles (SCG-SN) Compressor Station facility, located 11 miles south of Needles, CA on Hwy 95, has applied for the renewal of their Federal Operating Permit (FOP) pursuant to the provisions of MDAQMD Regulation XII. The Applicant is a company engaged in the compression and distribution of pipeline quality natural gas for use by its customers throughout Southern California. The facility is required to maintain a Title V permit because the potential emissions exceed the major source thresholds for Nitrous Oxides, Carbon Monoxide, and Hazardous Air Pollutants (HAPs). Concurrent with their Title V Renewal, SCG-SN has proposed the addition of a New SPARK-IGNITED (SI) NATURAL GAS IC ENGINE, POWERING AN AIR COMPRESSOR. The new engine will be equipped with Best Available Control Technology (BACT) and all new emissions will be offset with Emission Reduction Credits (ERCs) that are owned by SCG.

REQUEST FOR COMMENTS: Interested persons are invited to submit written comments and/or other documents regarding the terms and conditions of the proposed renewal of South Needles Compressor Station's Federal Operating Permit. If you submit written comments, you may also request a public hearing on the proposed issuance of the Federal Operating Permit. To be considered, comments, documents and requests for public hearing must be submitted no later than 5:00 P.M. on February 18, 2021, to the MDAQMD, Attention: Samuel J Oktay, PE at the address listed below.

PETITION FOR REVIEW: Federal Operating Permits are also subject to review and approval by the United States Environmental Protection Agency (USEPA). If the USEPA finds no objection to the proposed permit renewal, the final permit will be issued. In the event of public objection to the issuance of a specific permit, a Title V petition may be submitted to the USEPA Administrator electronically through the Central Data Exchange at: https://cdx.epa.gov/. In order to file a Title V petition, issues must be raised with reasonable specificity during the public comment period, and filed within 60 days of the close of the USEPA review period.

AVAILABILITY OF DOCUMENTS: The proposed Federal Operating Permit, as well as the application and other supporting documentation are available for review at the MDAQMD offices, 14306 Park Avenue, Victorville, CA 92392. In addition, these documents are available on the MDAQMD website and can be viewed at following link: https://www.mdaqmd.ca.gov/permitting/public-notices-advisories/public-notices-permitting-regulated-industry. Please contact Samuel J Oktay, PE, Air Quality Engineer, at the address, above, or (760) 245-1661, extension 1610, or at soktay@mdaqmd.ca.gov for additional questions pertaining to this action and/or corresponding documents.
